

ACIDO-SEPT S

Limescale Removing Concentrate of Disinfecting Effect

Microbial spectrum: bactericide (MRSA), yeasticide.

Conditions of application - for disinfecting: room temperature (working time: 10 min. for a 5% solution; 5 min. for a 10% solution). For removing stronger crusts: 10-20% solution (working time: 10-30 min.); also in concentrated state (working time: 1-2 h.) for removing thick crusts.

Areas and methods of usage: the product is designed for professional use. It can be applied in catering, private and public health care, food industry and all other fields where it is necessary to clean surfaces by degreasing, removing limescale, crust of milk, metallic oxides or other deposits and, also, to disinfect them subsequently. Prepare the work solution of the preferred concentration (50-100ml for 1l of water) and temperature (20-50°C) with the appropriate dilution (higher temperature facilitates its efficiency). After that, handle the affected surface with this work solution by spraying, brushing, immersing or other ways. Cleaning can be intensified mechanically. When the working time has elapsed, remove the remains of the preparation by rinsing the surface with water. The substance is damaging to surfaces of zinc, marble, limestone and oxides.

EU hazard symbol:

Flammability: not flammable

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H314 - Causes severe skin burns and eye damage.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: Rinse mouth. Do not induce vomiting.

P303 + P361 + P353 - If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the sewage generated during correct usage can be discharged into public drains after being processed appropriately depending on the circumstances of use. The preparation easily degrades biologically.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened package at a dry cool but freeze-free place protected from sunlight, separated from foodstuffs, reactants and substances forming gases in contact with acids (cyanides, chemicals containing active chlorine, etc.). Comply with instructions of specific storage.

P102 - Keep out of reach of children.

Quality preservation time: 36 months after the production date in normal storage conditions; 12 months after unpacking.

Packaging units: 20l and 5l can, 1l flacon.

Produced and distributed by: INNOVENG 1 Kft.
