

ALU-CLEAN

Cleaning concentrate for aluminium surfaces

Areas and methods of usage: the product is designed for professional use. It can be applied in all fields where it is necessary to clean surfaces of aluminium, zinc and their alloys, bronze, etc., covered by grease, oil, soot and other contaminations. It can be utilised very fruitfully by food industry plants and public meal providers, restaurants, canteens, confectionaries, bakeries, roast bars, etc., for removing burnt-on remains of meat, milk or vegetable oil as well as such services as machine repair shops, garages or boiler rooms for eliminating burnt-on contaminations of lubricants, soot, etc. The diluted work solution made from the concentrate can be used for manual and mechanical cleaning alike. Dilute the concentrate to the preferred extent by adding the appropriate quantity of it to the precedingly dosed amount of water, homogenise the substance by mixing and heat it to the right temperature. Put the hot solution to the surface of the object to clean by immersing, scattering or perfusion and maintain the contact until the working time elapses. Finally, rinse the surface with water and remove the untied contamination by water jet or another mechanical device.

Recommended concentration, temperature and working time: 3-20%, 25-70°C, 5-30-180 min. (depending on the extent of contamination and the applied temperature).

EU hazard symbol:

Flammability: not flammable.

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H314 - Causes severe skin burns and eye damage.

P260 - Do not breathe dust/smoke/mist/vapour/spray.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: Rinse mouth. Do not induce vomiting.

P303 + P361 + P353 - If on skin (or hair): Take off immediately all contaminated clothing.

Rinse skin with water / shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the sewage generated during correct usage can be discharged into public drains after being processed appropriately depending on the circumstances of use. 20-litre cleaned containers can be handled as municipal waste.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened package at a dry cool but freeze-free place, separated from foodstuffs and acids. Comply with general instructions of storing chemicals.

P405 - Store locked up.

Packaging units: 20l and 5l can.

Produced and distributed by: INNOVENG 1 Kft.
