

INNOFLUID-METAL-P

Degreasing and cleaning concentrate
Foaming preparation for immersing

Areas and methods of usage: the product is designed for professional use. It can be applied in all fields where it is necessary to degrease iron and steel objects, aluminium or colour metal surfaces. It can be utilised very fruitfully in manufacturing and repairing machines for performing the cleaning process before galvanisation, enamelling or painting as well as in various areas of motor vehicle industry. The silicate-free preparation can be dissolved very well. It is suitable for removing various types of oil, cooling and lubricating emulsion, oil remains, shavings and other materials which the surface may get contaminated by during elaboration. It can be also used at low temperature. Prepare a work solution by diluting the concentrate. Put the degreasing solution onto the surface and maintain the contact for an appropriate while. After the end of the working time, greases will be able to be removed from the treated surface. In concentrated state or as a 20-50% aqueous solution, the preparation can remove lubricating greases from components of machines with the same efficiency as currently applied highly flammable and explosive hydrocarbon derivatives. The temperature of the solution is practical to be higher than the dripping point of the grease to remove. Cleaning can be made more efficacious by moving the solution; we recommend the application of nozzles to accelerate the streaming to accomplish that.

Recommended concentration: 1-5%; 20-100% for thick greasing.

Recommended temperature and working time: 30-90°C, 3-20 min.

EU hazard symbol:

Flammability: not flammable.

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions. Its intensive degreasing effect may necessitate it to supplement the fats solved out of the skin by a cosmetic cream.

H314 - Causes severe skin burns and eye damage

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: Rinse mouth. Do not induce vomiting.

P303 + P361 + P 353 - If on skin (or hair): Take off immediately all contaminated clothing.

Rinse skin with water / shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the sewage generated during the correct usage of the preparation can be discharged after being processed appropriately, depending on contaminations, in accordance with general and local regulations. 20-litre cleaned containers can be handled as municipal waste. P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened container at a dry cool but freeze-free place protected from sunlight, separated from foodstuffs. Comply with general instructions of storing chemicals.

P405 - Store locked up.

Packaging units: 20- and 5l can.

Produced and distributed by: INNOVENG 1 Kft.
