

Innofluid-TF-Klór CS
Cleaning concentrate of disinfecting effect

Microbial spectrum: bactericide, fungicide.

Conditions of application at room temperature - working time: 10 min. (for 2.0% concentration); 5 min. (for 3.0% concentration).

Areas and methods of usage: the product is designed for professional use. It is an intensively foaming liquid cleaning disinfectant containing active chlorine. It can be applied in various fields of food industry, catering, social support, etc., where disinfection is also required as well as cleaning. It is primarily designed for being carried onto the affected surface by using a foam generator but the operation may be performed by brushing or any other suitable ways; in the latter case, the foam will be less rigid and less permanent. The rigid foam gets stuck on tiles or other smooth surfaces; thus, it can be applied well for the cleaning disinfection of vertical surfaces. Prepare a work solution of the appropriate concentration and temperature; get it to contact with the surface to disinfect. When the working time is over, remove the remains of the preparation by rinsing with water. The work solution should always be made by adding the right concentration to the previously dosed water and homogenising the substance by mixing them together.

EU hazard symbol:

Warning: hazard

Flammability: not flammable

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H314 - Causes severe skin burns and eye damage.

H400 - Very toxic to aquatic life.

EUH031 - Contact with acids liberates toxic gas.

P260 - Do not breathe dust/fume/gas/mist/vapours/spray.

P273 - Avoid release to the environment.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: Rinse mouth. Do not induce vomiting.

P303 + P361 + P 353 - If on skin: Take off immediately all contaminated clothing.

Rinse skin with water / shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the contaminated solution can be discharged into public drains after being processed and neutralised appropriately, depending on contaminations, in accordance with general and local regulations.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened container at a dry cool but freeze-free place protected from sunlight, separated from foodstuffs, acids and oxidants. Comply with general instructions of storing chemicals.

P102 - Keep out of reach of children.

P410 - Protect from sunlight.

Quality preservation time: 6 months after the production date in case of appropriate storage conditions (1 month if unwrapped).

Packaging units: 20- and 5l can, 1l flacon.

Produced and distributed by: INNOVENG 1 Kft.
