

INNO-CHLOR FOAM

Disinfecting cleaner

Microbial spectrum: bactericide, fungicide.

Conditions of application: 3.0% concentration at room temperature; working time: 5 min.

Areas and methods of usage: the product is designed for professional use. It is a highly foaming liquid cleaning disinfectant of active chlorine content. It can be applied in various areas of food industry, catering, social support, health care, etc., where both of cleaning and disinfection are important. It is primarily designed for being put on the affected surface by using a foam generator; nevertheless, the operation can be performed by brushing or other ways but the foam will be less rigid and less durable. The rigid foam will grip on the tiles or other smooth surfaces; thus, it can be applied very efficiently when treating vertical surfaces. Prepare a cleaning and disinfecting work solution of the appropriate concentration and temperature separately, pour it to the previously dosed water, homogenise it by mixing and keep it in contact with the surface. When the working time is over, remove the remains of the preparation by rinsing with drinking water.

EU hazard symbol:

Warning: hazard

Flammability: not flammable.

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions. If you feel unwell due to any kind of exposure, get medical advice/attention immediately.

H314 - Causes severe skin burns and eye damage.

H400 - Very toxic to aquatic life.

EUH031 - Contact with acids liberates toxic gas.

P260 - Do not breathe dust/fume/gas/mist/vapours/spray.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: Rinse mouth. Do not induce vomiting.

P303 + P361 + P353 - If on skin or hair: Take off immediately all contaminated clothing.

Rinse skin with water / shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the contaminated solution can be discharged into public drains after being processed and neutralised appropriately, depending on contaminations, in accordance with general and local regulations. 20-litre cleaned containers can be handled as municipal waste.

P273 - Avoid release to the environment.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened container at a dry cool but freeze-free place protected from sunlight, separated from foodstuffs, acids and oxidants. Comply with general instructions of storing chemicals.

P102 - Keep out of reach of children.

P410 - Protect from sunlight.

Packaging units: 20- and 5l can, 1l flacon.
