

INNO-DEOSEPT

A preparation for inhibiting the formation of unpleasant smells

Areas and methods of usage: the product is designed for professional use. It can be applied in all fields where the degradation of organic substances in a solution may liberate gases of unpleasant smell (sludge, tailings, industrial sewage, etc.). Applying the preparation inhibits the induction of such smelling. It can be used primarily at places for storing sewage or other waste containing organic substances (food industry plants, beer factories, canneries, protein processing, stockbreeding, etc.) but it can be also utilised actually in all industrial areas.

The concentrate is extremely efficient. Add 3-5 ml/m³ of it to the sewage or sludge and mix it together with the substance to treat. The appropriate quantity and

frequency can be defined exclusively on the basis of experience determined by the conditions of usage. Since the preparation does not evaporate, supplementing it is necessary only in case of water exchange. The first application is practical to be introduced by a so-called shock therapy meaning 10-30 ml/m³ to add to the affected substance and applying the original concentrate after a trial period of one week. Followed by the process, the treated sewage or sludge should be stored for at least three months.

Recommended concentration: 3-5 ml/m³ or as determined by experience.

Frequency of dosing: based on experience.

EU hazard symbol:

Warning:

hazard

Flammability:

not flammable.

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H302 - Harmful if swallowed.

H314 - Causes severe skin burns and eye damage.

H400 - Very toxic to aquatic life.

P280 - Use protective gloves / protective clothing / eye protection / face protection.

P301 + P330 + P331 - If swallowed: rinse mouth. Do not induce vomiting.

P303 + P361 + P353 - If on skin or hair: take off immediately all contaminated clothing.

Rinse skin with water / shower.

P312 - Call a poison centre / doctor if you feel unwell.

P304 + P340 - If inhaled: remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the sewage treated by the preparation can be discharged only after being processed according to current regulations.

P273 - Avoid release to the environment.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened container at a dry cool but freeze-free place in accordance with general instructions of storing chemicals.

P405 - Store locked up.

Packaging units: 20- and 5l can.

Produced and distributed by: INNOVENG 1 Kft.
