

## INNO-OVEN CLEAN

**Areas and methods of usage:** the product is designed for professional use. The special composition of the preparation makes it suitable for cleaning the internal surface of a combined convection-steam oven. It removes burnt-on grease and remains of food; besides, it also keeps the internal surface of the appliance clean. It can be applied via the cleaning system of the oven; in that case, the system will automatically dose the preparation and perform rinsing by running the cleaning program. The appropriate dose varies depending on the extent of contamination. The dosing system should be set up by trained personnel. In case of manual cleaning, put the substance onto the surface by a flask with a sprinkler head and, after some minutes, remove it by rinsing.

**Recommended parameters:** concentrated state; room temperature (raising the temperature makes it more efficient); working time: 3-5 min.

**EU hazard symbol:**

**Warning:** hazard

**Flammability:** not flammable

**Safety recommendations:** use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H314 - Causes severe skin burns and eye damage

P260 - Do not breathe dust/fume/mist/vapours/spray.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.
