

INNOPON-RABA-P

Industrial degreasing cleaner for treating steel objects Designed for immersing

Areas and methods of usage: the product is designed for professional use. It is an intensive alkaline general-purpose degreasing cleaner of solid state. It can be applied in degreasing iron and steel objects as well as cleaning platforms strongly contaminated by oil or grease. As a degreasing cleaner, it may be used in one-zone appliances because it also works without rinsing. The preparation forms a stable emulsion along with the leached grease or oil. Its application is recommended for immersing procedure. After preparing a work solution of the appropriate concentration and temperature, make a contact between the affected surface and this solution and maintain it until the end of the working time. Circulating the fluid increases the efficiency of cleaning significantly; for this purpose, we recommend our system equipped with a pump and nozzles to accelerate circulation. After the end of the process, rinse the surface with water if necessary.

Recommended concentration: 1-5%

Recommended temperature and working time: 60-90°C, 3-30 min.

EU hazard symbol:

Warning:

hazard

Flammability:

not flammable

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions

H314 - Causes severe skin burns and eye damage.

H335 - May cause respiratory irritation.

H290 - May be corrosive to metals.

P260 - Do not breathe dust/fume/mist/vapours/spray.

P280 - Wear protective gloves / protective clothing / eye protection / face protection.

P303 + P361 + P 353 - If on skin or hair: Take off immediately all contaminated clothing.

Rinse skin with water / shower.

P304 + P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.

P305 + P351 + P338 - If in eyes: Rinse cautiously with water for several minutes.

Remove contact lenses if present and easy to do. Continue rinsing.

Environmental protection: the applied work solution can be discharged into public drains after being processed and diluted appropriately, in accordance with current regulations. Cleaned containers can be handled as municipal waste.

P501 - Dispose of contents/container in accordance with local regulations.

Storage: store the preparation in its original unopened container at a dry cool but freeze-free place protected from sunlight, separated from foodstuffs. Comply with general instructions of handling and storing chemicals.

P405 - Store locked up.

Packaging units: 25kg sack.

Produced and distributed by: INNOVENG 1 Kft.
