

Innopon-Text-Q
Washing detergent with disinfecting effect

Conditions of application - concentration: 1.4-2.0% (for textile articles); working time: 15-20 min.; temperature: 60-90°C.

Areas and methods of usage: the product is designed for professional use. It is a washing detergent for treating prewashed or soaked textile articles (see: Innopon-Text-EL prewasher). We recommend it to various communal, industrial, medical and social laundries, spas, daycentres and other public institutes for performing the main washing procedure in a hygienic way. As a chlorine-free disinfecting detergent, it can be used for washing and disinfecting colour and colour sensitive clothes as well. However, it is not suitable for handling wool or silk articles. Prepare a washing solution from the preferred quantity of the preparation depending on the contamination and the rigidity of water. Wash the soaked or prewashed article by this solution for 15-20 minutes at the highest possible temperature allowed according to its material (60°C at least). It should be followed by rinsing once with warm water and more times with cold water using the preferred rinser or neutraliser.

EU hazard symbol:

Warning: hazard

Flammability: not flammable

Safety recommendations: use the preparation exclusively for its function in accordance with general labour hygienic and labour safety instructions.

H314 - Causes severe skin burns and eye damage.

H335 - May cause respiratory irritation.
