

**INNOPON-TEXT**  
Industrial washing powder

**Areas and methods of usage:** the product is designed for professional use. It can be applied in washing all kinds of textile articles except for the ones made of wool or silk. It is suitable for washing textile products with various contaminations, completed by additives distributed by our company to enhance its efficiency. For the main washing, prepare a work solution and wash the textile article for 5-25 minutes at the highest possible temperature chosen according to its material. Washing is followed by rinsing once with warm and more times with cold water, dosing the appropriate rinsing, neutraliser or disinfectant. For the main washing, you can add whiteners, rust removers, grease removers, protein removers or additives intensifying grease and soil removing effect to the preparation.

**Application parameters - concentration:** 6-8 g/l; temperature: 30-90°C or as proper for the material of the treated article; working time: 5-25 min.
